

ALIREZA AFSHAN

Software and Systems Engineer

alirezaafshan4@gmail.com • +974 5089 1117 • Doha, Qatar • github.com/YesterdaysLemon

SUMMARY

Motivated Software and Systems Engineering student with hands-on experience leading mobile application and backend development projects in academic and government-aligned environments. Strong interest in learning new technologies, solving complex problems, and understanding systems end-to-end—from software architecture to deployment and operations. Experienced with React Native, cloud data platforms, and DevOps fundamentals, with a proactive approach to experimentation, collaboration, and continuous improvement. Eager to contribute to real-world engineering challenges while growing technical and professional skills through an internship opportunity.

EXPERIENCE

Lead Developer

Dec 2025 - April 2025

Mobile App Project - Drive Safe

Doha

Worked with a colleague to complete a mobile app project / proof of concept for the Qatar Ministry of Education.

The application's goal was to create a way to stop unauthorized users from accessing use of a vehicle.

Project included:

- React-Native Mobile Interface
- Firebase Cloud Data Management
- Photo Based Verification

Lead Developer

Mar 2025 - Apr 2025

Mobile App Project - QR Attendance Verification

Doha, Qatar

Leveraging the previous architecture of the Drive Safe Project, was able to make a custom proof of concept for a mobile solution, also for the Ministry of Education to create a mobile app that would help verify student attendance using QR-Codes.

Project included:

- React-Native Mobile Interface
- Firebase Cloud Data Management
- QR-Code generation and Mobile Permissions

Lead Developer

Sep 2025 - Expected May 2026

UDST Capstone Project - CentraID

Doha, Qatar

Collaborated with a team of 5 other students to help build a custom attendance solution for universities utilizing a hybrid RFID Card/Mobile Device system.

As a team member I helped contribute to:

- Software Architecture and Planning - Microservice Architecture
- Technology Stack Choice
- Novel Feature Developments - Wi-Fi RTT

As well as handled the DevOps Pipeline aspect of the project, which included:

- Setting up a CI/CD Pipeline for ongoing work.
- Containerizing Backend Structure using Docker.

EDUCATION

University of Arizona

Sept 2018 - May 2022

Incomplete - Bachelor of Science in Mathematics

Tucson

Relevant Coursework: Astronomy and Mathematics, completed coursework up to year 3 before interruption.

University of Doha for Science and Technology

Jan 2023 - Expected May 2026

Bachelor of Science in Information Systems

Doha, Qatar

Relevant Coursework: Software Engineering in various languages (Java, JavaScript, Python), Dev-Ops, Designing Systems, Linux, Networking, System Administration.

SKILLS

Technical Skills: HTML, CSS, JavaScript, Nodejs, Express, TypeScript, React, React Native, Tailwind, Java, Python, Object-Oriented Programming, Database Management, MySQL, NoSQL (Mongo, Redis), Hardware (Soldering, Testing), Version Control (Git, GitHub), Containerization (Docker)

Languages: English (Native), Farsi (Conversational)

Additional Skills: Mathematics, Philosophy, Arts, Public Speaking, Magic the Gathering and other Trading Card Games, Custom Keyboards, Botany, Guitar.

CERTIFICATIONS

- Cybersecurity Foundation, Palo Alto Cybersecurity Program

May 2024

- Certificate of Recognition - Ministry of Higher Education, Scientific Research Competition

April 2025
